It's beginning to look a lot like Christmas in new **THE JOURNEY** world!

The weather forecast is in for The Journey's brand-new Winter Wonderland, and we can guarantee all riders a virtual white Christmas.

Work your way through a heavy blanket of snow and discover a world decorated in holiday cheer from the seat of your bike. Reindeer, candy canes, gingerbread men and, of course, presents under the tree. Even in the falling snow, our workouts are sure to keep you warm and toasty.

The Journey is compatible with our entire catalog of workouts, featuring top-

quality workouts by industry giants like Wattbike, Keiser and BodyBike as well as workouts by our network of more than 7000 dedicated indoor cycling instructors. When you run a workout using The Journey, our software generates an entirely new visual experience every time you work out, making sure you never run out of new magical scenery to explore. Let your imagination run wild and forget all about your exertion for a highly motivating immersive indoor cycling experience.

We wish our business partners, instructors, and home users a very happy holiday season and hope our latest virtual world gets you in the holiday spirit!

Would you like to gift the members of your club with classes featuring The Journey this year? Feel free to contact us at contact@intelligent-cycling.com to learn more.

[Watch the teaser for Winter Wonderland now.](#)

The new world will be released on the 30th of November.

Intelligent Cycling® develops indoor cycling software that keeps riders motivated and moving. Recommended by industry giants like Wattbike®, Bodybike®, Schwinn®, and Keiser®, the Danish company is at the forefront of its industry.

Intelligent Cycling focuses on digital training solutions that meet the needs of club owners, instructors, and club members, both in and outside of the studio.

Services include an intuitive and user-friendly workout platform, on-demand content, streaming of live virtual classes, and VR-ready immersive indoor cycling adventure, The Journey.

Intelligent Cycling® software is used in fitness clubs, gyms, and private homes all around the world.
