Professor Lars Samuelson - The first Swede inducted into the Cleantech Scandinavia Hall of Fame

Malmö, May 28th, 2013

PRESS RELEASE

Professor Lars Samuelson - The first Swede inducted into the Cleantech Scandinavia Hall of Fame!

Professor Lars Samuelson, director of the Nanometer Structure Consortium, was today inducted at an award ceremony today at the Cleantech Venture Day in Malmö.

The hall of fame has three members since before, in 2009 it was given to Lassi Noponen (the Investor), in 2010 to Alf Bjørseth (the Entrepreneur) and in 2011 to Markku Koivistu (the Intrapreneur). Adding Lars (the Researcher) is a tribute to his achievements but also highlights the crucial importance of his and other business driven researchers in cleantech growth.

Lars is one of the leading researchers in nano-science in the world. He is an innovative visionary that has not only created a world-class Nano-competence centre in Lund as a research platform for new materials, but also managed to realize his visions in creating game-changing cleantech companies like Glo and Sol Voltaics

Glo develops and commercialises nanowire light emitting diodes (LEDs) for illumination markets in Sweden and internationally. The company has been successful in attracting international venture capital and established an

engineering centre in Silicon Valley, but is still connected to the research environment in Lund.

Sol Voltaics AB introduces a new type technology that can produce materials for solar cells that generates a higher efficiency with an attractive low cost for customers. Sol Voltaics will be in Malmö these days at Cleantech Venture Day to meet with international investors in search of capital to build a factory for large-scale production.

The official motivation is: *“For creating a world class research-based cleantech applications generator that has the eyes and ears of international finance. Lars Samuelson is an inspiration for showing how to turn research into business”*

As the previous nominees, Professor Samuelson received a piece of art from renowned Raku-artist Dan Leonette who resides in Gotland, Sweden.

The Cleantech Scandinavia Hall of Fame awards people that have inspired others in the Nordic cleantech industry, helping to accelerate Nordic cleantech development and growth. It is handed out by Cleantech Scandinavia, it is not sponsored and has no other purpose than the above.

Cleantech Scandinavia runs an internationally established network of investors, industrials and public actors, all with an interest in Nordic Cleantech. During our five years in business we have become a trusted source of cleantech-related investment opportunities, business intelligence, investment statistics and we are a renowned provider and promotor of Nordic Cleantech.

Om Cleantech Scandinavia

Cleantech Scandinavia driver ett etablerat internationellt nätverk med investerare, industriaktörer och offentliga aktörer, alla med ett intresse i nordisk cleantech. Under våra sex år av verksamhet har vi blivit en ansedd källa till cleantech-relaterade investeringsmöjligheter, business intelligence, investeringsstatistik och vi är en välrenommerad aktör för marknadsföring av nordisk cleantech internationellt. Idag har Cleantech Scandinavia runt 70 medlemmar från Norden, Baltikum, Kina, Storbritannien, Belgien, Tyskland, Spanien och USA. Några exempel på medlemmar är Capricorn, Evonik, Tsing Capital, Cleantech Invest, Investinor, Sustainable Technologies Fund, Baltcap, General Electric, Fortum, BASF Ventures, Dow Ventures, IKEA Greentech, Volvo Venture Capital och Energimyndigheten.

Cleantech Scandinavia is a membership network of investors and affiliated cleantech professionals designed to provide cleantech knowledge, contacts and investment opportunities; be a coordinating voice to promote the Nordic cleantech sector, and drive cleantech innovation and growth in the Nordic countries. Cleantech Scandinavia offers its members a series of networking and pitching events, business intelligence research and reports including Nordic cleantech deal flow statistics, and holds a database of investment opportunities in the region.
