Announcement | Texray AB Gothenburg, Sweden from October 18th, 2021

[Scorad Medical BV](#) and [Texray AB](#) signed a distribution agreement effective for the Netherlands and for Texray Radiation protection devices: HeadPeace and MindPeace.

"We are very happy to have Scorad and their established team to join us at Texray in our global commercialization. At Texray our users are very important to us, and we hope that all of them have got that feeling from when being in contact. I feel very comfortable with team Scorad and that they will be able to forward this very important company culture, we want to maintain", says Petra Apell, one of the founders and the CEO of Texray

About Scorad

Scorad Medical BV was founded in 2018 as an independent distributor for products in the radiology department. With a focus on X-ray quality assurance equipment, X-ray protection equipment and products for an interventional radiology room, Scorad has rapidly grown to become a well-established sales agent for state-of-the-art innovation medical devices. Scovas a sister company, specializes in the four different fields of peripheral, aortic, neurology and radiology which offers medical devices within this arena.

"We are very proud to announce our newest collaboration with Texray. At Scorad Medical, we are always looking for new innovative radiation protective products to maintain healthcare of our professionals. Texray is an innovative and professional company with a massive mission to create a healthier work environment for our global health professionals. We are very excited to introduce comfortable, protective, and innovative products of Texray in the Netherlands. We are looking forward to our future", says Rik Pierlo, Teamleader Radiology of Scorad Medical.

About Texray

Texray, based in Gothenburg, Sweden, has developed the world's first radiation protection textile to address the need for comfortable and safe personal protection equipment (PPE). It is currently used in products designed for healthcare professionals exposed to X-ray radiation in surgical interventions. The Texray material may also provide value for professionals in various industry sectors, including first response and aeronautics.
