Join business talk on digitalisation in logistics!

PSA International (PSA) is one of the leading global port groups, with ports spanning across Asia, Europe and the Americas. With a global footprint comprising a network of over 50 coastal, rail and inland terminals in 19 countries, PSA not only helps to move mountains of goods across oceans, but they view trade as it takes place in the world on a daily basis. PSA envisions IoL to be a logistics ecosystem of connected and inter-operable nodes (physical, regulatory and financial) to enable cargo and trade flow visibility, expedition and evolution.

Mr Tan will share his views on:

- Connecting communities across ports, shipping and the global supply chain: challenges and opportunities presented by digitalisation and technology
- Sharing PSA's European Portfolio and action plans thereof
- Intermodal logistics: seamless connectivity for greater supply chain efficiency
- Sustainability implications and the role of logistics
