Focus on IT & Cybersecurity

Digital transformation provides endless possibilities. But you have to be aware of fake news, deepfakes and constantly new methods of intrusion attempts. That is why we organize Sigma's Inspiration Days on the subject, in both Stockholm and Gothenburg. We are happy to introduce to you IT and cybersecurity experts who generously will share their knowledge and experiences on this hot topic.

What are the biggest risks right now? How should companies do to protect important information? How is the privacy affected by surveillance cameras?

This and much more awaits you on November 21 and 22.

Tomorrow Report – A brand new survey

Right now, a digital revolution is underway. The success stories are many and new opportunities are being created in this very moment. But how can we in Sweden maintain our strong position if there is not enough competence in the country? To address the issue, we at Sigma IT have asked Kantar Sifo to conduct a survey to learn more on how Swedes think about digitalization and technology.

Be the first to read this interesting report! All guests at the Inspiration Days will receive their own copy, hot off the press.
