## Latest Commercial Energy Prices

Today's energy market analysis from Apollo Energy has revealed a slight fall in the price of business electricity, alongside a small increase in the price of business gas.

The leading energy brokers would like to invite anyone looking to secure a more competitive business energy contract to take a look at the graph and get in touch with them today. Their in-house energy brokers will be able to talk them through the graph and help tender the best possible contract for their business.

---

Apollo Energy are leading energy brokers offering a wide range of bespoke utility management services to businesses and organisations throughout the UK.

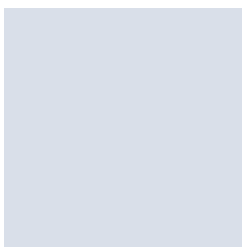

The company has been in operation since 2001 - and from the very outset has operated in an ethical and professional manner.

The company's directors have over 50 year's experience working within the utilities sector, and have developed strong relationships with the majority of industrial and commercial energy suppliers.
