iKommunicate - Next Generation Marine Interfacing with Signal K and NMEA

Dear Dealer

Here's some light weekend reading to update you on iKommunicate!

A new, open source interfacing standard for marine electronics and applications is rapidly gaining traction. It's called Signal K and Digital Yacht are proud to introduce our new iKommunicate NMEA to Signal K gateway and server.

iKommunicate was developed following a successful Kickstarter campaign which shows the demand from consumers for "next level" on board connectivity.

We want our dealers and partners to be leading the way in marine electronic's technology so this 5 minute guide will keep you updated and show the opportunities and benefits of next generation interfacing.

You can download the presentation from [HERE](#) or click on the download link below

Best wishes,

The Digital Yacht Team
