New innovations in Global Functional Flours Market to grow at a CAGR of 6.14% during the period 2017-2022

About Functional Flours

Functional flours are made from grains and non-grains using a unique hydrothermal treatment process. The grains used in the manufacturing of functional flours include wheat, corn, rice, rye, oats, and others. The non-grains are mostly pulses. Hydrothermal treatment process controls the particle size and aids the cold or hot bonding capacity. Functional flours are gaining popularity among consumers across countries due to their functional and nutritional properties.

Technavios analysts forecast the global functional flours market to grow at a CAGR of 6.14% during the period 2017-2021. **Get Sample Copy Of This Report**
